The Emergency Management team is excited to share some great news — we’ve launched a new SharePoint site that allows the campus community to identify the wardens in their own areas. Emergency Wardens now populate and maintain their own status and information on the SharePoint site, which enhances the accuracy of our records, additionally Senior Wardens may update the building warden’s information on their behalf.

If you would like to see your Building Wardens, go to the site now and log in with your IT username and password

Click on the Warden’s Contact List
Your building wardens will be displayed, to make changes click Edit

To add new wardens click New Item

To remove a warden change the role to “No Longer a Warden”

If you have any questions, email us at emergencymgmt@ucalgary.ca.

*Faculty and Department are not required fields when completing warden information, therefore this information may not be available.
